## **ELAPP: The Unauthorized Tour**

Presented by Stephen Dickman  
Wednesday, September 21<sup>st</sup> @ 7pm  
Hillsborough County Extension Service

This month's program will be by Stephen Dickman, an Environmental Specialist II with the Conservation Services Section of the Hillsborough County Parks, Recreation, and Conservation Department. He will describe several native plant habitat restoration projects on Hillsborough County Environmental Lands Acquisition and Protection Program (ELAPP) properties. He'll share photos of the before, during, and after stages of the restoration process with beautiful photos of our local native plants.

Stephen has worked in the Parks, Recreation, and Conservation Department of Hillsborough County for nearly 15 years. His responsibilities include the full range of land management activities: conducting plant and animal surveys for rare, threatened, endangered, and invasive species; monitoring the progress of habitat restoration; and conducting prescribed (controlled) burns. When you have questions about the natural areas in Hillsborough County, Stephen can provide the answers (just ask my Botany students).

As a photographer, Stephen developed a keen eye for details. Through his experience photographing plants, he acquired his botanical skills through many happy hours identifying plants in the field with a dichotomous key in one hand and 10x lens in the other. He continues to expand his botanical knowledge by attending conferences, workshops, classes, field trips, plant sales, and occasional visits to USF Herbarium. Stephen also served as president of the Suncoast Chapter FNPS in 1999 and 2000.

Join us for this photographic tour of some of Hillsborough County's finest wildflowers in their natural habitats!

*Submitted by Daphne Lambright*

The Florida Native Plant Society was organized in 1980 to promote the preservation, conservation, and restoration of the native plants and native plant communities of Florida. For more information about the Florida Native Plant Society, please visit our web site: [www.fnps.org](http://www.fnps.org)

**Field Trip Report:  
Weeki Wachee River  
Saturday, August 20, 2011**

Last month's field trip to the Weeki Wachee River was one of the few paddling field trips that Suncoast offers to our members. Our normal field trip coordinator was unable to lead the trip, so I volunteered to round up the troops. Joel Jackson offered to let me join him in his very nice two man kayak, and I accepted the offer. We were joined by Bob Williamson in his single kayak, and Bunny Worth and Ruth Scalera teamed up in a canoe.

We hit the water at 8:30 in the morning, and were pretty much by ourselves on the river. The river is absolutely beautiful and crystal clear for most of the run. We saw blooming cardinal flower (*Lobelia cardinalis*) right off the bat. The swamp dogwoods (*Cornus foemina*) were some of the finest examples I have seen and seemed to be one of the dominate species along the river banks. It was also peculiar to see sand pine (*Pinus clausa*) growing just a few feet from a sweet gum (*Liquidambar styraciflua*) in some places.

There were plenty of photo opportunities along the way, and I was tempted to jump out of a few trees that were 'modified' for such sport. Joel continued to encourage me to do so, but in the end, I (for once) let better judgment prevail, though we did witness a few youths jumping from a tree at the end of the run.

Towards the latter part of the run, development has obviously altered the river and the water quality began to decline. Traffic started to pick up as well. However, it did not detract from the whole experience, and all of us had a great time. Once the outfitters picked us up and returned us to our vehicles, we realized what a good decision it was to get on the water early - the parking lot was packed! It seems that Weeki Wachee State Park is a popular place for folks to visit.

Thanks to all of our participants for making this a memorable trip! Hope you join us next time!

## September Field Trip

Our September field trip will be on **Sunday** the 25<sup>th</sup> to Fish Hawk Creek Preserve, an ELAPP property, with our leader, Stephen Dickman. We'll see sandhill, scrub, mesic and xeric hammocks habitats with numerous native plants. Also, examples of sites before and after selective hardwood removal and prescription burns to restore the sandhill areas.

Meet at **9AM** Sunday, at the site, 16118 Boyette Road <http://mapq.st/onNEC5>. We'll be parking along the road, so carpooling is encouraged. GoogleMaps and Map Quest will both get you close. For more information, please check our website or give me a call at 813-951-0946.

## Announcements

### New Books Added to the Library

The SNPS library has acquired two new books - Best Native Plants for Southern Gardens - Gil Nelson and Bringing Nature Home - Doug Tallamy. Both books are well worth checking out. A DVD of Doug Tallamy's talk at an FNPS meeting is also available in our library. He will be the keynote speaker at the 2012 conference on Saturday, May 19, and has a important message for all backyard gardeners. Mark your calendars now and be sure to register for the conference in the spring!

### Calendar items

- ☆ 9/24 Plant City Garden Club Sponsored Plant Sale, Downtown Train Depot 9am-3pm, SNPS will be selling books and seeds
- ☆ 9/25 field trip with Steve Dickman
- ☆ 10/8-9 USF plant sale - contact Troy to sign up to help, we still need volunteers!
- ☆ 10/15 Boktoberfest at Bok Tower Gardens with large plant sale from 8am-6pm

*- Submitted by Janet Bowers*

### Seeking SNPS Board Members for 2012

The nominating process has begun for our next SNPS board of directors. Some current board members will continue to serve, but we will need several fresh faces. If you are interested in serving your chapter of the Florida Native Plant Society in this way, please call me at 813-908-9398, or email me at [hw@tampabay.rr.com](mailto:hw@tampabay.rr.com).

## PLANT PROFILE

**Common name:** Common buttonbush

**Botanical name:** *Cephalanthus occidentalis* L.

**Family:** Rubiaceae (Madder)

**Plant Habit:** Medium-sized, deciduous, understory shrub

**Habitat:** Swamps, floodplains, lake margins

**Size (h x w):** 10 ft. by 8 ft.

**Leaves:** Opposite or in whorls of 3 or 4, simple, elliptical 3 to 6-inch long leaves

**Bloom:** Sessile; round ball of white flowers

**Flowering time:** Spring to fall

**Fruit:** Dense ball splitting into 2-4 nutlets

**Bark:** Reddish-brown and smooth; becomes ridged and furrowed with age

**Distribution:** Throughout Florida; eastern Canada to Florida and west to Texas

### Growing conditions

**Light:** Part shade

**Water:** Wet

**Soil:** Organic

**Propagation:** Seed, stem cuttings

**Motility:** Self-sown seedlings and root suckers

**Maintenance:** Occasional pruning for shaping

**Availability:** Native nurseries

**Comments:** Obligate wetland plant - occurs almost always under natural conditions in wetlands; excellent understory shrub along a wetland
